Mark Jacobson
NetGain Technologies
2031 Georgetown Road
Lexington, KY 40508

Dear Mark,

Commonwealth Cancer Center has been a NetGain Technologies client for about 3-4 years and during this time we have had a very positive experience.

When we were looking for IT help, we knew we needed a company that was local, and a company that we could rely on. NetGain Technologies was that company! During our relationship with NetGain, we decided to move our main location. This was going to be a very challenging move, but we knew with the help of NetGain, we could handle it.

The move entailed relocating our main servers and our entire IT infrastructure. Before the move occurred, NetGain sat down with us to create a plan to make the move as easy as possible. Being a medical practice, we needed to accomplish a move that had little to no down time. We were extremely happy with the pace that the project took and we experienced very little down time.

Since the move, everything has been running smoothly. NetGain was, and has been the perfect candidate and we couldn't have done it without your help.
