Lexington, KY 40511

Dear Mark,

Lynn Imaging has been a Netgain client for over five years. During this time Netgain has helped us with many projects.

We recently purchased an HP Proliant Server with an MSA2000. When we were looking at Virtualization we decided it would be a good idea to look at our options. We looked at another company besides NetGain but we did not feel they had the right solution for our needs. When NetGain came in to talk to us about Virtualization they explained everything from how it would help my company to the money we would be saving.

Virtualization has had a huge impact on our company and has made the tasks of server management much easier. The NetGain engineers are top notch and have always been able to solve our IT issues. NetGain has impressed us here at Lynn Imaging and I am glad we made the decision to partner with them. We have had a great experience and I would certainly recommend NetGain to my colleagues. Sincerely,
